EDUCATION

Zhejiang University

Ph.D. student in Software Engineering. Supervisor: *Wei Chen*

Hangzhou, China

Sept. 2023 – June 2028 (Expected)

Xi'an Jiaotong University

B.E. in Software Engineering GPA: 3.9 / 4.3, Rank: 2 / 103

Xi'an, China

Sept. 2019 – June 2023

SELECTED PUBLICATIONS

- **Zhaorui Yang***, Bo Pan*, Han Wang*, Yiyao Wang, Xingyu Liu, Luoxuan Weng, Yingchaojie Feng, Haozhe Feng, Minfeng Zhu, Bo Zhang, Wei Chen. **Multimodal DeepResearcher: Generating Text-Chart Interleaved Reports From Scratch with Agentic Framework**. **AAAI 2026 (Oral, 26 cites & 58 stars)**.

DeepResearch systems typically generate text-only reports, despite visualizations being essential for real-world analysis. We introduced Multimodal DeepResearcher, an agentic framework for generating text-chart interleaved reports from scratch, together with a structured chart representation that enables LLMs to generate diverse, high-quality visualizations.

- **Zhaorui Yang**, Tianyu Pang, Haozhe Feng, Han Wang, Wei Chen, Minfeng Zhu, Qian Liu. **Self-Distillation Bridges Distribution Gap in Language Model Fine-Tuning**. **ACL 2024 (132 cites & 168 stars)**.

Fine-tuning LLMs often improves downstream performance at the cost of general capabilities. We attributed this trade-off to the distribution gap between task data and the pretrained model, and proposed Self-Distillation Fine-Tuning (SDFT) to bridge this gap by aligning fine-tuning data with the model's original distribution.

- **Zhaorui Yang**, Huawei Zheng, Sen Yang, Yuhui Zhang, Haoxuan Li, Zhizhen Yu, Xuan Yi, Chen Hou, Defeng Xie, Chao Hu, Minfeng Zhu, Dazhen Deng, Haozhe Feng, Danqing Huang, Peng Chen, Wei Chen. **ProSPy: A Profiling-Driven SQL-Python Agentic Framework for Enterprise Text-to-SQL**. **Under review**.

Real-world Text-to-SQL faces challenges from heterogeneous schemas, incomplete metadata, SQL dialects, and complex analytical queries. We proposed **ProSPy**, a profiling-driven SQL-Python agentic framework that combines efficient SQL-based retrieval with flexible Python analysis, ranking No. 2 on Spider 2.0-Lite at submission; its improved successor, Tianqiong Data Agent, currently ranks No. 1.

- Haozhe Feng*, **Zhaorui Yang***, Hesun Chen*, Tianyu Pang, Chao Du, Minfeng Zhu, Wei Chen, Shuicheng Yan. **CoSDA: Continual Source-Free Domain Adaptation**. arXiv preprint arXiv:2304.06627, 2023.

Continual Source-Free Domain Adaptation (SFDA) suffers from catastrophic forgetting when adapting to a sequence of target domains. We identified a fundamental trade-off between adaptation gain and forgetting loss, and proposed CoSDA, a continual SFDA framework that effectively balances adaptation and knowledge retention, outperforming prior methods under continuous domain shifts.

INTERNSHIPS

Tencent | Data Computing Platform Department, TEG

July 2025 – Mar. 2026

- I led the ProSPy project described above, from problem formulation and system design to experimentation. It ranked No. 2 on Spider 2.0-Lite at submission, and the successor, Tianqiong Data Agent, currently ranks No. 1.

Alibaba | Qwen Foundation Model Team, ATH

April 2026 – Present

- I contributed to the development of the search teacher model for Qwen 3.8 Max, focusing on evaluation and trajectory analysis pipelines, long-horizon training data construction, and large-scale SFT and RL experiments on hundreds of H200 GPUs. I am currently working on reinforcement learning for Qwen's cyber model, targeting long-horizon CTF and exploitation tasks studied by frontier AI labs.

AWARDS

China National Scholarship (2x).

Dec. 2022 & Dec. 2021
